PROFESSIONAL SUMMARY

Software Engineering graduate and full-stack developer with hands-on experience across React, Node.js, Java, and Angular. Currently interning at Synapse Solutions Pvt. Ltd., contributing to a production Social CRM platform — debugging third-party API integrations, resolving deployment issues, and shipping user-facing features. Built and shipped 8+ independent projects spanning web, mobile, and backend systems, with practical experience in REST API design, authentication (JWT/RBAC), and both SQL and NoSQL databases.

CORE TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, SQL, PHP

Frontend: React.js, Angular, React Native, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, Spring MVC, Jakarta EE, REST APIs, WebSockets, JWT, RBAC

Databases: MySQL, Firebase Firestore, MongoDB, SQLite

Tools & Platforms: Git, GitHub, Postman, Vercel, Figma

Familiar / Self-Learning: AES Encryption, ESP32/IoT basics, Python & OpenCV fundamentals

PROFESSIONAL EXPERIENCE

Software Engineer Intern · Synapse Solutions Pvt. Ltd.

May 2026 – Present

- Contributing to ddesk, a production Social CRM platform built on Java Spring MVC, AngularJS, and MySQL, integrated with the Meta Marketing API.
- Diagnosed and resolved a series of Meta Marketing API integration errors affecting campaign creation, ad set scheduling, and budget parameter validation.
- Identified and fixed a recurring deployment failure by ensuring the Maven `core` module was rebuilt before WAR packaging, restoring stable builds across environments.
- Delivered a tooltip integration into the production platform using JavaScript, improving feature discoverability for the full active user base.
- Submit pull requests, complete code reviews, and follow structured Git branching workflows as part of a professional engineering team.

KEY PROJECTS

Universal Contact API

Jun 2026 · Personal

Node.js, Express, Nodemailer, Vercel

- Built a free, self-hosted contact-form backend for static sites as a secure alternative to paid services like Formspree and Web3Forms.
- Implemented HMAC SHA-256 request signing with 60-second replay protection, IP-based rate limiting, and honeypot spam filtering.
- Deployed serverless on Vercel with SMTP-based owner notifications and automated visitor confirmation receipts.

AnyDown — Universal Social Media Downloader

Mar 2026 · Personal

React, Vite, Node.js, Express, FFmpeg, Tailwind

- Built a download tool supporting 1,000+ platforms via yt-dlp, including YouTube, Facebook, Instagram, and TikTok, with automatic platform detection.
- Shipped as a PWA with offline support and Framer Motion animations, removing the need for an app-store install on desktop or mobile.

ACADEMIC PROJECTS (BSC COURSEWORK)

Independent projects built as part of the BSc (Hons) Software Engineering program — designed REST API backends with Jakarta EE/EJB serving 100+ concurrent users, improved database query speed by ~40% through schema normalization and indexing across 10,000+ records, and implemented real-time messaging with WebSockets and Firebase achieving sub-100ms delivery.

MrDeen — Food Delivery & Restaurant Management

Oct 2024

Java, Android, Firebase, PayHere API, JWT

- Developed a multi-restaurant ordering app with 3-tier RBAC for customers, restaurant admins, and super-admins.
- Integrated the PayHere payment gateway to support secure, end-to-end live order payments.

HelaChat — Real-Time Cross-Platform Chat

Oct 2024

JavaScript, React Native, Firebase Firestore

- Built an iOS and Android chat app with Firebase Firestore real-time sync and email-verified login.

GreenBasket — E-Commerce Platform

University

Java, MySQL, JavaScript

- Built a full-stack shopping site; reduced database query time by ~60% through indexing and query optimization.

HelaBank — Banking Web App

University

Java, MySQL, AES-256

- Built a secure banking system with AES-256 encryption, session management, and audit logging.

GlobeMed — Hospital Management System

University

Java, MySQL, MVC

- Built a desktop hospital management application spanning 8+ normalized database tables.

EDUCATION

BSc (Hons) Software Engineering

Aug 2022 – Apr 2026

Java Institute for Advanced Technology · Birmingham City University (UK), Sri Lanka

GCE Advanced Level

2020 – 2022

Kalutara Vidyalaya National School, Sri Lanka — Mathematics Stream: ICT, Combined Mathematics, Physics

GCE Ordinary Level

2019

Kalutara Vidyalaya National School, Sri Lanka — 9 Passes, including Mathematics (A) and ICT (A)

CERTIFICATIONS

- Introduction to MERN Stack — Simplilearn, Apr 2026 (MongoDB, Express.js, React, Node.js)
- Advanced Git Concepts — Simplilearn, Apr 2026
- GitHub Basics — Simplilearn, Apr 2026
- Ethically Hack the Planet, Parts 1–4 — Udemy, Mar–Apr 2026 (Kali Linux, Ethical Hacking)
- Foundations of User Experience (UX) Design — Google, 2025
