PROFESSIONAL EXPERIENCE

Software Engineer Intern · [Synapse Solutions Pvt. Ltd.](#)

May 2026 – Present

- Delivered a tooltip integration into the production platform using JavaScript, improving feature discoverability for the full active user base.
- Improved contextual UX — users can now locate key features without opening support documentation.
- Submit pull requests, complete code reviews, and follow Git branching workflows within a structured engineering team.

Software Engineering Graduate · [Java Institute](#) · [BCU \(UK\)](#)

Aug 2022 – Apr 2026

Academic program — projects built independently as part of BSc coursework

- Built 8+ projects across web, mobile, and desktop stacks including React, Node.js, Java, and Android.
- Designed REST API backends with Jakarta EE and EJB — served 100+ concurrent users with sub-second response times.
- Improved database query speed by ~40% through schema normalization and indexing across 10,000+ records.
- Integrated real-time messaging using WebSockets and Firebase — achieved sub-100ms message delivery across platforms.
- Managed Git version control across all projects — branching, conflict resolution, and clean commit histories.

KEY PROJECTS

AnyDown — Universal Social Media Downloader · [React](#), [Vite](#), [Node.js](#), [Express](#), [FFmpeg](#), [Tailwind](#) · Mar 2026 | Personal

- Built a download tool supporting 1,000+ platforms via yt-dlp, including YouTube, Facebook, Instagram, and TikTok, with automatic platform detection.
- Shipped as a PWA — offline support, Framer Motion animations, and no app-store dependency on desktop or mobile.

MrDeen — Food Delivery & Restaurant Management · [Java](#), [Android](#), [Firebase](#), [PayHere API](#), [JWT](#) · Oct 2024 | University

- Developed a multi-restaurant ordering app with 3-tier RBAC for customers, restaurant admins, and super-admins.
- Integrated PayHere payment gateway for live transactions — system held 100+ concurrent users with no lag.

HelaChat — Real-Time Cross-Platform Chat · [JavaScript](#), [React Native](#), [Firebase Firestore](#) · Oct 2024 | University

- Built iOS and Android chat app — real-time messages delivered in under 100ms with email-verified login.

Additional Projects

- GreenBasket** — E-Commerce Platform (Java, MySQL, JS) — full-stack shopping site; DB query time cut by ~60%.
- HelaBank** — Banking Web App (Java, MySQL, AES-256) — secure system with encryption, session management, and audit logs.
- GlobeMed** — Hospital Management System (Java, MySQL, MVC) — desktop app across 8+ normalized database tables.
